Dear Colleague,

It gives us immense pleasure to invite you to the One Day Seminar on "Zoology: Current Scenario and Evolving Trends" scheduled to be held on 6<sup>th</sup> March, 2018, at the Department of Zoology, Biomedical Technology and Human Genetics. The seminar aims at creating awareness among our undergraduate, post-graduate and research students regarding the recent developments and emerging technologies in this field.

The information burst and logarithmic growth of scientific exploration in the past few years had led to a vast expanse in the knowledge base. This has evoked greater insights into understanding the complex interaction and impact of bio-molecules and environmental factors on human life.

Through this seminar we endeavor to bring to our students some of these innovations and infuse in them a core commitment of working towards a balance between biotechnological development and environmental conservation.
